NEW Colorful HUD (Weapons, Radio & Map Blips)

How to Install ?

1. Create "mods" folder in the main directory of GTA5, copy and paste your "update" folder inside the one you just created. If you have done this already, you are good to go. You can now continue to the next step.
2. Download OpenIV from www.openiv.com, install it and open GTA V for Windows.
3. Click on "Tools" button in the upper ribbon, and select "Package Installer".
4. Navigate to the folder where you saved the mod and select "NEW Colorful HUD.oiv". Use "NEW Colorful HUD [uninstall].oiv" if you want to go back to original.
5. Click on the "Install" button. Select the install location. [remember to back-up your "update" folder inside the "mods" folder before installing the mod, just in case].
6. Close OpenIV and start the game!
(same installation steps apply to other packages included in this mod)
